PROFILE

Engineering professional with 12+ years of experience across digital product and project management, with an MSc in Sustainable Energy and a BSc in Naval Architecture. Currently at IKEA of Sweden as Digital Product Owner / Specialist, main responsible for all CAD and FEA applications, driving development, integration, lifecycle management, and vendor coordination across the CAD and FEA toolchain.

SKILLS

- ◆ CAD/CAE Systems & Automation
- ◆ SolidWorks Expert (Design, Simulation, API)
- ◆ PLM/PDM (Windchill, 3DEXPERIENCE)
- ◆ Simulation & FEA | HPC
- ◆ Naval Architecture & Marine Design (Rhino, Maxsurf, AutoCAD)
- ◆ Engineering Automation & CAD Software Development
- ◆ Wind Energy Engineering (Onshore & Offshore)
- ◆ Digital Product Ownership (Engineering Tools)
- ◆ VB.NET, MATLAB, Xcode (Swift)

CERTIFICATES

- ◆ PRINCE2® Foundation Certificate in Project Management (PRINCE2®)
- ◆ Certified Associate Project Manager (CAPM®)
- ◆ Certified SolidWorks Expert in Mechanical Design (CSWE-MD)
- ◆ Certified SolidWorks Expert in Simulation (CSWE-Simulation)
- ◆ University of the Arts London - Design Management Short Degree Course

LANGUAGES

- ◆ English (Fluent)
- ◆ Turkish (Native)
- ◆ Swedish (C1-Svenska som andraspråk)

PATENTS

- ◆ Backfilling Protection Structure for Backfilling of a Cable Joint (EU 20201169.5 - 1201 - Filed Oct, 2020)

INTERESTS

- ◆ iOS Development (3 apps published on the App Store)
- ◆ Watch Enthusiast
- ◆ Football & Sports & Travel

ASIL ERGÜNER

Digital Product Specialist @ IKEA of Sweden | Engineering | Product & Project Management | Software Development & Automation | Design | Design Management

📍 Växjö, Sweden

EXPERIENCE

Oct 2022 - Present

◆ Digital Product Owner/Specialist • IKEA of Sweden AB 📍 Älmhult, SWEDEN

As Digital Product Specialist for IKEA of Sweden's 30+ CAD/CAE tool ecosystem, I lead SolidWorks development, CAD automation, and CAE/FEA digital products, acting as the interface between users and software and hardware vendors. I own the full FEA hardware and software lifecycle, covering procurement of simulation applications and HPC infrastructure (hardware as a service), vendor management, license management and optimization, software agreements, contract negotiations, and budget oversight, as well as module preparation, testing, deployment, system maintenance, upgrades, and HPC operations. I have designed, developed, and lead two SolidWorks add-ins in VB.NET serving all IKEA design engineers: the IKEA SolidWorks Utility (MCAD), with macros covering PLM integration, packaging CAD, and daily MCAD workflows, and the Cadda add-in for CAD Standards management. I lead CAD standards development and digitalization through a database-driven system built with Windchill RV&S, as well as CAD/PLM (Windchill) integration and engineering automation. I provide user training and support for custom tools, MCAD and simulation applications. I led a product team of a UX designer and a developer delivering custom software projects, and I support PLM rollout initiatives and contribute to cross-functional efforts including the CAD integration tools and PLM Consumables concept.

Aug 2021 - Sep 2022

◆ PLM Developer • CTC AB 📍 Ljungby, SWEDEN

Led the implementation and rollout of a 3DEXPERIENCE PLM system, including SolidWorks data migration and engineering workflow setup. Responsible for CAD data preparation and migration, ensuring structure, consistency, and usability within the PLM environment, while collaborating with engineering teams to define processes, configure the system, and drive adoption. Supported end-to-end implementation from early stages, including system setup, user training, onboarding, and acting as the interface between engineering needs and PLM system capabilities.

Jun 2019 - Aug 2021

◆ Mechanical Design Engineer • NKT Cables 📍 Alingsås, SWEDEN

Worked on the design and development of connectors, terminations, and accessories for offshore and subsea power cable systems, supporting product development from concept to validation. Responsible for SolidWorks-based mechanical design and structural/FEA simulations to verify performance and reliability, while contributing to engineering changes, project coordination, and cross-functional collaboration with manufacturing and engineering teams. Delivered design solutions and validation support for offshore cable systems across multiple development stages.

Apr 2018 - May 2019

◆ Mechanical Design Engineer • Winfoor AB 📍 Lund, SWEDEN

Worked in a startup environment on the development of an innovative wind turbine concept, contributing across mechanical design, project coordination, and engineering systems setup. Responsible for 3D modeling and mechanical design using Autodesk Inventor, supporting early-stage product development from concept to prototype. Also contributed to project planning and established a lightweight PDM system for managing CAD data and revisions in a fast-paced development environment.

Sep 2016 - Feb 2018

◆ Naval Architect • Hauschildt Marine 📍 Copenhagen, DENMARK

Worked as a Naval Architect on the design and development of marine vessels, contributing to both conceptual design and detailed engineering. Responsible for 3D vessel modeling using Rhinoceros (Rhino) and preparation of 2D technical drawings using AutoCAD, supporting the transition from concept to production-ready documentation. Collaborated with engineering and production teams across design development stages, delivering 3D vessel models and engineering documentation for marine design projects from concept to detailed execution.

Jul 2013 - Jun 2015

◆ Design & Planning Engineer • Sarp Yachts 📍 Antalya, TURKEY

Worked on the design and planning of a 46-meter mega yacht (SARP 46), contributing to 3D modeling and engineering activities across multiple onboard systems. Responsible for 3D design of piping systems and layouts, supporting system integration and overall vessel design coordination. Contributed to engineering documentation, project planning, and cross-functional collaboration between design and production teams in a complex yacht development project.

EDUCATION

Aug 2015 - Jun 2017

◆ Technical University of Denmark • MSc. Eng. Sustainable Energy (Wind Energy Study Line)

Thesis: Repowering Alternatives and Feasibility Studies of Middelgrunden Wind Farm

Sep 2008 - Jun 2013

◆ Technical University of Istanbul • BSc. Eng. Naval Architecture & Marine Engineering

Grade: 3.14/4.00 - High Honor List

Sep 2010 - Feb 2011

◆ Technical University of Lisbon • BSc. Eng. Naval Architecture & Marine Engineering

Erasmus Exchange Program
